The things that you are allergic to really add up

If you are allergic to pollen, that might not be the only reason you are sneezing, and if you have asthma that might not be the only reason you are wheezing. It may be because you are sensitive to more than one allergen. Allergens often add up and can cause you to sneeze, wheeze or get a runny nose.

To stay symptom free, you need to stay under your threshold. Every person has a different level at which they show symptoms. Until the level is reached, they are not affected. When that level is crossed however, the combination of allergens turns into symptoms.^{1,2}

Reduce Exposure to Your Allergic Triggers³

Duddead dead dead dead dead dead dead dea	st mites are microscopic creatures that live in ad skin flakes. Encase mattresses, pillows, and box springs in aller. Wash bedding weekly in 130° F hot water Keep house clean by vacuuming and reducing clutice. Wear an appropriate mask while cleaning and avoid 20 minutes after cleaning. Change furnace and air conditioner filters. Use a dehumidifier to reduce the humidity in your lockroaches. Ckroaches ckroach saliva, fecal material, and shed skins at wash dishes, vacuum, keep food and garbage in clean date out garbage regularly. Don't store paper bags, newspapers, or cardboard. Place bait traps, or call a professional exterminator. Seal plumbing openings, cracks, and crevices colds (Indoor). Independent of the place is the professional exterminator.
